In preparing the Financial Statements, management is responsible for assessing its ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate or cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's Financial Reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with NSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decision of users taken on the basis of these Financial Statements.

As part of an audit in accordance with NSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentation, or the override of internal controls.
- Obtain an understanding of Internal Control relevant to audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Company's Internal Control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on its ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditor's Report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Audit Report. However, Future events or conditions may cause the Company to cease to continue as a going concern.

3. Significant Accounting Policies

(a) Property and Equipment

i) Recognition

Freehold land is carried at historical cost and other items of Property and Equipment are stated at cost of acquisition or construction less accumulated depreciation when, it is probable that future economic benefits associated with the item will flow to the Company and it can be used for more than one year and the cost can be measured reliably.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it meets the recognition criteria as mentioned above. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

ii) Revaluation

After recognition as an assets, lands and buildings whose fair value can be measured reliably, have been carried at revalued amount at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations are being performed to ensure that the fair value of a revalued asset does not materially differ from its carrying amount as at the reporting date. Valuation of the land and buildings are undertaken by professionally qualified valuers.

An increase in the carrying amount as a result of revaluation, is recognized in other comprehensive income and accumulated in equity under the heading of revaluation reserve. However, the increase is recognized in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit and loss. A decrease in the carrying amount as a result of revaluation, is recognized in profit or loss. However, the decrease is recognized in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Additionally, accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred directly to retained earnings.

Difference between depreciation on the revalued carrying amount of the asset and depreciation based on the asset's original cost is transferred to retained earnings.

iii) Depreciation

Depreciation of Property and Equipment other than the Freehold Land i.e. the Company's Freehold Building, Plant & Machinery, Vehicles & Other Assets is provided on Straight Line Method (SLM), Useful Life estimated by technical expert of the management.

The Assets Useful Life and Residual Values are reviewed at the Reporting date and the effect of any changes in estimates are accounted for on a prospective basis.

Useful Life of Property and Equipment based on SLM is categorized as stated below:

List of Assets Categories	Useful Life (In Years) for SLM
Land	NA
Buildings	NA
Leasehold Improvement	7 or lease term
Furniture & Fixture	7
Computers and IT Equipment	7
Officer Equipment	7
Vehicles	10

iv) Derecognition

An item of Property and Equipment is derecognized up to disposal or when no Future Economic Benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of Property and Equipment is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.

v) Impairment of Assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the Asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. Assets that suffer an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. In case of such reversal, the carrying amount of the asset is increased so as not to exceed the carrying amount that would have been determined had there been no impairment loss.

vi) Capital Work-In-Progress

These are expenses of capital nature directly incurred in the construction of buildings, major plant and machinery and system development which are to be capitalized. Capital Work in Progress would be transferred to the relevant asset when it is available for use. Capital Work in Progress is stated at cost less any accumulated impairment losses.

(b) Goodwill & Intangible Assets

i) Recognition

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in Statement of profit or loss in the year in which the expenditure is incurred.

Subsequent expenditure on intangible assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Goodwill on business combination is recognized on the acquisition date at the excess of (a) over (b) below:

(a) The aggregate of :

1. The consideration transferred measured in accordance with the NFRS 3, which generally requires acquisition-date fair value
2. The amount of any non-controlling interest in the acquiree measured in accordance with the NFRS 3, and
3. In a business combination achieved in stages, the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree.

(b) The net of the acquisition date amounts of the identifiable assets acquired and the liabilities assumed.

ii) Amortization

The useful lives of intangible assets are assessed to be either finite or indefinite. An intangible asset shall be regarded as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflow for the entity.

Amortization is recognized in statement of profit or loss on Straight Line Method (SLM) over the estimated useful life of the intangible assets/ Diminishing Balance Method (DBM), from the date that is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the

asset. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of profit or loss.

Useful Life of Intangible Assets based on SLM/DBM is categorized as stated below:

List of Assets Categories	Useful Life (In Years) for SLM
Software's	10
Firewall Licenses	3
IRMIS API Integration software	5
Windows server and I ensure	2

iii) Derecognition

An Intangible Asset is derecognized when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the derecognition is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.

iv) Impairment of Assets

The Company assesses at each reporting date as to whether there is any indication that Intangible Assets may be impaired. If any such indication exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. An impairment loss is recognized in the Statement of Profit or Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

(c) Investment Properties

Cost Model

Property that is held for rental income or for capital appreciation or both, is classified as investment property. Investment properties are measured initially at cost, including related transaction cost. It is subsequently carried at cost less accumulated depreciation. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

Land is carried at historical cost, however, buildings are depreciated over their estimated useful lives as mentioned above.

Investment properties are derecognized either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the statement of profit or loss in the year of retirement or disposal.

Transfer is made to (or from) investment property only when there is a change in use. For a transfer from investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

OR

Fair Value Model

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market condition at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise, including the corresponding tax effect.

The fair value of investment property is determined by an external, independent property valuer, having appropriate recognized professional qualification and recent experience in the location and category by property being valued.

Investment properties are derecognized either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the statement of profit or loss in the year of retirement or disposal.

Transfer is made to (or from) investment property only when there is a change in use. For a transfer from investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

(d) Cash & Cash Equivalent

Cash & Cash Equivalents includes Cash in Hand, Cheque in Hand, Bank Balances and short-term deposits with a maturity of three months or less.

(e) Financial Assets

i) Initial Recognition & Measurement

Financial Assets are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Assets at initial recognition.

When Financial Assets are recognized initially, they are measured at Fair Value, plus, in the case of Financial Assets not at fair value through profit or loss, transaction costs that are attributable to the acquisition of the Financial Asset. Transaction costs of Financial Assets carried at Fair Value through Profit or Loss are expensed in the Statement of Profit or Loss.

ii) Subsequent Measurement

a) Financial Assets carried at Amortized Cost (AC)

A Financial Asset is measured at amortized cost if it is held within a business model whose objective is achieved is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income in these financial assets is measured using effective interest rate method.

b) Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are measured at fair value and changes are taken to statement of other comprehensive income.

c) Financial Assets at Fair Value through Profit or Loss (FVTPL)

A Financial Asset which is not classified in any of the above categories are measured at FVTPL.

iii) De-Recognition

A Financial Assets is derecognized only when the Company has transferred the rights to receive cash flows from the Financial Assets. Where the Company has transferred an Asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the Financial Asset. In such cases, the Financial Asset is derecognized. Where the Company has not transferred substantially all risks and rewards of ownership of the Financial Asset, the Financial Asset is not derecognized. Where the Company retains control of the Financial Asset, the Asset is continued to be recognized to the extent of continuing involvement in the Financial Asset.

iv) Impairment of Financial Assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of

impairment may include indications that a financial asset or a group of financial assets is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

(f) Financial Liabilities

i) Initial Recognition & Measurement

Financial Liabilities are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Liabilities at initial recognition.

All Financial Liabilities are recognized initially at Fair Value, plus, in the case of Financial Liabilities not at fair value through profit or loss, transaction costs that are attributable to the issue of the Financial Liability.

ii) Subsequent Measurement

After initial recognition, Financial Liabilities are subsequently measured at amortized cost using the Effective Interest Method.

For trade and other payables maturing within one year from the date of Statement of Financial Position, the carrying amounts approximate Fair Value due to short maturity of these instruments.

iii) De-Recognition

A Financial Liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing Financial Liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the Statement of Profit or Loss.

(g) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the Statement of Financial Position where there is legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

(h) Reinsurance Assets

Reinsurance assets are the assets which are created against insurance contract liabilities of the amount which are recoverable from the reinsurer. These assets are created for the reinsurer's share of insurance contract liabilities.

A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after the initial recognition of the reinsurance asset, that the Company may not receive all amounts due to it under the terms of the contract, and the event has a reliably measurable impact on the amount that the company will receive from the re-insurer. If a reinsurance asset is impaired, the company reduce the carrying amount accordingly and is recognized in statement of profit or loss.

(i) Equity

Financial Instruments issued by the Company are classified as Equity only to the extent that they do not meet the definition of a Financial Liability or Financial Asset.

(j) Reserves and Funds

i) Share Application Money Pending Allotment

ii) Share Premium: Not applicable.

iii) Catastrophe Reserve: Created at 10% of profit after deducting fund transferred to special reserve and excluding deferred tax as per guidelines of Nepal Insurance Authority (NIA).

- vii) **Revaluation Reserves:** Not applicable, since fixed and intangible assets are measured at cost.

- ix) **Other Reserves:** CSR fund is created at 1% of net profit excluding deferred tax as per guidelines of Nepal Insurance Authority. In Current FY, the net profit excluding deferred tax is negative so no Special Reserve has been created.

(k) Insurance Contract Liabilities

i) Provision for unearned premiums

Change in reserve for unearned insurance premium represents the net portion of the gross written premium transferred to the unearned premium reserve during the year to cover the unexpired period of the policies.

ii) Outstanding claims provisions

Outstanding claims provisions are based on the estimated ultimate cost of all claims incurred but not settled at the statement of financial position date, whether reported or not, together with related claims handling costs.

iii) Provision for claim incurred but not reported (IBNR)

Significant delays are experienced in the notification and settlement of certain types of claims, the ultimate cost of which cannot be known with certainty at the statement of financial position date.

The liability is calculated at the reporting date using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation.

Liability adequacy

At each reporting date, the Company reviews its unexpired risk and a liability adequacy test is performed to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums. The calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant non-life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognized in the statement of profit or loss by setting up a provision for liability.

As the company has issued only two insurance policies during the year independent actuarial valuation has not been done based on materiality.

(l) Employee Benefits

i) Short Term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. - Defined Benefit Plan

For Defined Benefit Plan, the cost of providing benefits is determined using the Projected Unit Credit Method, with Actuarial Valuations being carried out at each Statement of Financial Position. Actuarial Gains & Losses are recognized in the Other Comprehensive Income in the period in which they occur. Past service cost is recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a Straight-Line Basis over the average period until the benefits become vested. The retirement benefit obligation recognized in the Statement of Financial Position represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, as reduced by the Fair Value of plan Assets (If Any). Any Asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

iii) Long Term Employee Benefits

The liabilities for un-availed earned leaves are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. Leave Encashment has been computed using Actuarial Assumptions and these are measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the year using the Projected Unit Credit Method. The benefits are discounted using the market yields at the end of the year that have terms approximating to the terms of assumptions.

iv) Termination

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary retirement in exchange of these benefits. The Company recognizes termination benefits at the earlier of the following dates:

- a) When the Company can no longer withdraw the offer of those benefits; and
- b) When the entity recognizes costs for a restructuring that is within the scope of NAS 37 and involves the payment of termination benefits. The termination benefits are measured based on the number of employees expected to accept the offer in case of voluntary retirement scheme.

Notes on Fair Value :

The Company obtains independent valuations for its investment properties. The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available, the Company consider information from a variety of sources including :

- i) current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences,
- ii) discounted cash flow projections based on reliable estimates of future cash flows,
- iii) capitalised income projections based upon a property's estimated net market income, and a capitalization rate derived from an analysis of market evidence.

Level 2 : Fair Value of Financial Instruments that are not traded in an active market is determined using valuation techniques which maximises the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to determine Fair Value of an instrument are observable, the instrument is included in Level 2.

Level 3 : If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

There is no transfer of Financial Instruments between different levels as mentioned above during the year.

(ii) Valuation Technique Used to Determine Fair Value

- a) Use of quoted market prices or dealer quotes for similar instruments
- b) Fair Value of remaining financial instruments is determined using discounted cash flow analysis

(iii) Valuation Process

The finance and accounts department of the Company performs the valuation of financial assets and liabilities required for financial reporting purposes. Discussion on valuation processes and results are held at least once in a year.

The main level 3 inputs are derived and evaluated as follows:

- a) Discount rate is arrived at considering the internal and external factors.
- b) Discounting has been applied where assets and liabilities are non-current, and the impact of the discounting is material

46 Insurance Risk

Insurance risk includes the risk of incurring higher claims costs than expected owing to the random nature of claims, frequency and severity and the risk of change in the legal or economic conditions of insurance or reinsurance cover. This may result in the insurer having either received too little premium for the risks it has agreed to underwrite and hence has not enough funds to invest and pay claims, or that claims are in excess of those expected.

The Company seeks to minimise insurance risk through a formalised reinsurance arrangement with an appropriate mix and spread of business between classes of business based on its overall strategy. This is complemented by observing formalised risk management policies.

The Company considers insurance risk to be a combination of the following components of risks:

- Product development
- Pricing
- Underwriting
- Claims Handling
- Reinsurance
- Reserving

Notes to the Financial Statements

a) Product development:

The Company principally issues the following types of Non-Life Insurance contracts:

- Property
- Motor
- Engineering
- Cattle and Crop
- Miscellaneous

The above risk exposure is mitigated by the diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits.

Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are put in place to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business.

b) Pricing:

The pricing of an insurance product involves the estimation of claims, operational and financing costs and the income arising from investing the premium received. The pricing process typically comprises collecting data on the underlying risks to be covered, determining the pricing assumptions and the base rate, setting the final premium rate, and monitoring the review of the appropriateness of pricing.

The Company collects adequate data to validate the reasonableness of the underlying assumptions used for pricing. The base rate represents the amount required to meet the value of anticipated benefits, expenses, and margins for risks and profit. Data primarily relates to the company's own historical experience and that of the industry where relevant. These may be supplemented by other internal and external data, and could include trends observed in claims costs and expenses.

Pricing is done by modelling all identified risks, using appropriate methodologies depending on the complexity of the risks and available data. Adequate buffers are kept in the premiums to cushion against the risk that actual experience may turn out to be worse than expected.

c) Underwriting:

The Company's underwriting process is governed by the internal underwriting procedures. Some of the actions undertaken to mitigate underwriting risks are detailed below:

- i) Investments are made on the training and development of underwriting and claims management staff, including those attached to the distribution network.
- ii) Application of Four-Eye principle on underwriting process.
- iii) Pre-underwriting inspections are made on new business over a predetermined threshold to evaluate risk prior to acceptance.
- iv) Post-underwriting reviews are conducted to ensure that set guidelines have been observed.
- v) Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers.

Notes to the Financial Statements

d) Claims handling:

The Company considers insurance claim risk to be a combination of the following components of risks:

- i) Mortality Risk – risk of loss arising due to policyholder death experience being different than expected
- ii) Longevity Risk – risk of loss arising due to the annuitant living longer than expected
- iii) Investment Return Risk – risk of loss arising from actual returns being different than expected
- iv) Expense Risk – risk of loss arising from expense experience being different than expected
- v) Policyholder Decision Risk – risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected

Some of the actions undertaken to mitigate claims risks is detailed below:

- i) Claims are assessed immediately,
- ii) Assessments are carried out by in-house as well as independent assessors/loss adjustors working throughout,
- iii) The service of a qualified independent actuary is obtained annually to assess the adequacy of reserves,
- iv) Post-underwriting reviews are conducted to ensure that set guidelines have been observed,
- v) Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers.

e) Reinsurance

The Company purchases reinsurance as part of its risks mitigation programme. Premium ceded to the reinsurers is in accordance with the terms of the programmes already agreed based on the risks written by the insurance companies. Recoveries from reinsurers on claims are based on the cession made in respect of each risk and is estimated in a manner consistent with the outstanding claims provisions made for the loss. Although we mitigate our exposures through prudent reinsurance arrangements, the obligation to meet claims emanating from policy holders rests with the Company. Default of reinsurers does not negate this obligation and in that respect the Company carries a credit risk up to the extent ceded to each reinsurer.

Sensitivities

The non-life insurance claim liabilities are sensitive to the key assumptions as mentioned in the table below.

The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and profit after tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis.

47 Financial Risk

a) The Company's activities expose it to Credit Risk, Liquidity Risk & Market Risk.

i) Credit Risk

Credit risk is the risk of financial loss as a result of the default or failure of third parties to meet their payment obligations to the Company. Thus, for an insurance contract, credit risk includes the risk that an insurer incurs a financial loss because a reinsurer defaults on its obligations under the reinsurance contract.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

- Company has credit risk policy which sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by entering into agreement with more than one party. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.
- The company deals with only creditworthy counterparties and obtains sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults.
